

Group 1

Lab 05 Data Preparation

ITAI-1371

Viswanatha Rao

Team Member Contribution Journal

Viktoriya Kurmisheva:

Created the GitHub repository for the project so the group could organize and share the completed files in one place. Completed Task 2 in the notebook by applying One-Hot Encoding to the categorical features and making sure the original categorical columns were removed after encoding. Also answered Question 2 in the Knowledge Check section by explaining how One-Hot Encoding converts categorical information into numerical values that a machine learning model can use. After discussing the lab and gathering thoughts from the other group members, wrote and organized the group's reflective journal based on the completed tasks, results, and concepts from the lab. Uploaded the completed reflection journal to the group repository.

Tien Manh Nguyen:

Reviewed the notebook and corrected the cells that were not formatted or running properly so the group could complete the required tasks without errors. Completed Task 1 in the notebook, which focused on handling missing values through data preparation techniques. Also answered Question 1 in the Knowledge Check section based on the concepts covered in the lab. After the other group members completed their assigned sections, reviewed their answers and work to make sure the results and explanations were correct and consistent with the lab requirements. Then uploaded the completed notebook to the group's GitHub repository.

Zaid Alayeddy:

Completed Task 3 in the notebook, which focused on the final data preparation technique covered in the lab. Also answered Question 3 in the Knowledge Check section using the concepts explored during the activity. In addition, gathered the contribution information from each group member and used it to write and organize the Team Member Contribution Journal. Reviewed the contribution details to make sure the journal clearly described how the work was divided among the group members, then uploaded the completed contribution journal.
